

Pharmacogenomics of Statin Safety and Efficacy

A Symposium

Date: Monday, 28 July 2008, 2:30 PM

Venue: Annual National Meeting of the American Association of Clinical Chemistry (AACC) in Washington, D.C.

Background on AACC: The AACC Annual Meeting is the "must attend" annual event for anyone involved in performing, directing, interpreting or developing clinical laboratory testing. The 2008 meeting will attract nearly 20,000 participants and nearly 700 exhibitors from more than 100 countries.

PROGRAM

Gualberto Ruaño, MD., PhD

Chairman and Moderator of the Symposium
President and Chief Executive Officer
Genomas, Inc.
Director of Genetics Research, Hartford Hospital
On the Pathway to DNA-Guided Statin Therapy

Stewart H. Lecker, MD, PhD

Beth Israel Deaconess Medical Center
Renal Unit
Boston, MA 02215
The molecular basis of statin myopathy

Ronald M. Krauss, MD

Senior Scientist and Director
Atherosclerosis Research Children's Hospital Oakland Research
Institute 5700 M.L. King Jr. Way Oakland, California 94609
Statin Safety and Efficacy: What is the Role of Pharmacogenomics in Clinical Practice?

Georgirene Vladutiu, PhD

Professor of Pediatrics, Neurology and Pathology Pediatrics Buffalo
General Hospital 100 High Street Buffalo, NY 14203
Genetic Susceptibility to Severe Statin-Induced Myopathy
