

III SYMPOSIUM OF GRADUATE RESEARCH IN BIOLOGY

“From cells to ecosystems:
an integrated approach in modern biology”

APRIL 18-19, 2008

UNIVERSITY OF PUERTO RICO - RIO PIEDRAS CAMPUS
NATURAL SCIENCES AUDITORIUM 142

The **BIOLOGY GRADUATE STUDENTS ASSOCIATION** is organizing this year symposium to present current graduate research and to encourage a holistic approach in biology by integrating multidisciplinary investigations across scales that go from the cells to the ecosystems.

REGISTRATION INFORMATION

Those interested in participating in this event and/or presenting an oral presentation or a poster should register at aegb.uprrp.edu/symposium

Deadline: April 4th, 2008

POSTER PRESENTATIONS

Boards will be available for students interested in presenting a poster of their current work.

INVITED KEYNOTE SPEAKERS

“DNA-Guided Medicine: Environmental and evolutionary foundations of personalized healthcare”

Gualberto Ruaño, M.D., Ph.D.

“Connecting genes, species, and ecosystems in ancient limestone grasslands”

Jason D. Fridley, Ph.D.

“The landscape ecology of plant-animal interactions: concepts and applications”

Daniel García, Ph.D.

“Germ cell development and regeneration in planarians”

Phillip A. Newmark, Ph.D.
